

At Eastern Biodiesel Technologies Pvt. Ltd/Biodiesel Technologies, Kolkata follows a step by step procedure of how to proceed with the concept of understanding the biodiesel processing plant to the stage of setting up the plant and commissioning the plant.

Here is a Step by Step Procedure that will help you to understand and to proceed with setting up the plant:

STEP 1: Inquiry received from our clients through the inquiry form available in our websites:

<http://www.biodieseltechnologiesindia.com> and <http://www.biodieseltechnocrats.in>

STEP 2: Detailed discussion:

A detail discussion is required with the Team of Eastern Biodiesel Technologies Pvt. Ltd after having gone through the General offer Letter, Quotation, and Commercial Feasibility.

STEP 3: Signing of the Agreement:

At Eastern Biodiesel Technologies Pvt. Ltd, we use a very Transparent Method of following Agreement. Once the customer decides to go ahead with the project and places us the final order, we sign an agreement disclosing all the details of how the project will be carried on. This agreement includes the following:

1. Warranties and Liabilities
2. Scope of work
3. Technical Specification (Specification and scope of supply, Description of equipment used)
4. Project implementation schedule
5. Commercial: It includes Price summary, Terms of Payment for the supply of the Plant, Delivery Details, Validity, Reservation
6. After Sales service.

After the agreement is duly signed by both the Parties at our Kolkata Office, we proceed with manufacturing the Biodiesel Processing Plant.

STEP 4: Placing the Order

Once the agreement is duly signed by both the parties, and modalities are sorted out. The customer has to pay us advance money in order to go ahead with the project and manufacturing the Processing Plant. (Depending upon the customer's need to get the final plant in a particular time frame, the advance money shall be decided while signing the agreement.)

STEP 5:

Once the customer places the order, he can go in for finding Land, building, factory shed, formulating backward and forward integration of feedstock and supply of finished product i.e., Biodiesel etc.

The Plant takes about 6 to 8 months of time to manufacture, and during this 6 to 8 months, the customer can look in to these details of Land, Licenses, Factory Shed etc. So that by the time the customer is done with all the formalities we are also done with the Plant and we can hand you an operational plant without wasting anytime in between.

STEP 6: INSPECTION

Eastern Biodiesel Technologies Pvt. Ltd believes in the policy of absolute transparency and customer satisfaction. We would like that our customer should visit the plant before the delivery and be satisfied with the project.

STEP 7: DELIVERY

Once the plant is ready, and a date has been finalized by the customer, we will dismantle the machine and it will be sent by our low slung trailers.

STEP 8: INSTALLATION AND COMMISIONING

Once the plant reaches the customers site and the customer has arranged for feedstock and other requirements, the entire team of Eastern Biodiesel Technologies Pvt. Ltd will visit the Plant site and make the Plant operational by running it for 72 hours and produce Biodiesel complying it with all national and international standard.

STEP 9: AFTER SALES SERVICE

In future if the customer happens to face any problem in the technical running of the plant or requires any kind of help, our team will be there to help you sort out the problem. All the details of such service are mentioned in our warranties guarantees etc.
